SHRISHTI SINHA

+91 7742258555 ⋄ shrishtisinha84@gmail.com ⋄ https://www.linkedin.com/in/shrishti-sinha/

SUMMARY

• Research and Analytics professional with **2+ years** of combined experience across academia and industry, specialising in data-driven decision-making at the intersection of **banking** and **climate sciences**, currently volunteering at **CDR.fyi**
• Holds an **interdisciplinary dual degree** in Biological Sciences and Electronics & Instrumentation Engineering from **BITS Pilani**, with research thesis at **University College London** examining impacts of climate change and land-use on biodiversity

WORK EXPERIENCE & INTERNSHIPS

Quantitative Analytics Specialist, Wells Fargo **July 2024 - Sept. 2026**
Full-Time (Bengaluru, India)
• Led the **model analysis** for five vendor models using key performance metrics like **KS statistic, AUC, False Positive Rate** and **Detection Rate**, identified optimal decision thresholds, enabling 14% improvement in fraud detection accuracy at lower false positive rates which prevents ∼**$100Mn.** in **fraud losses**. Led **cross-functional collaboration** with the strategy teams
• Built **operational** and **aggregate loss** models to quantify **risk exposure**, improving risk visibility by **15–20%**, enabling more informed strategy decisions. Resolved **model risk findings** in line with governance frameworks to ensure models were fit for use
• Implemented structured **user acceptance testing workflows** to validate changes against business requirements before deployment, reducing deployment-related issues by **25–30%** and improving roll-out efficiency by **20%**

Visiting Researcher, CBER Group, University College London **Aug. 2023 - June 2024**
Thesis: "Modelling the impacts of land use and climate change on biodiversity" (London, United Kingdom)
• Modeled biodiversity responses to climate and land-use change under different **RCP** scenarios using **GBIF** species occurrence records, the **PREDICTS** biodiversity database, **GLMs**, **GLMMs**, **Species Distribution Models (SDMs)**, and spatial simulations. Integrated climate (temperature, precipitation), land-use (primary/secondary vegetation, cropland, pasture, urban), and biodiversity datasets across to project species abundance, distributions, and richness
• Processed and analyzed large-scale geospatial datasets (∼118,000 grid cells) using parallelized simulations and statistical modeling to quantify the relative influence of climate and land-use variables on species distributions and biodiversity change

Data Analyst, Wells Fargo **May 2023 - July 2023**
Summer Internship (Bengaluru, India)
• Implemented the mathematical **Pluto-Tasche** methodology (using Python, Excel and R) and **Logistic Regression** for calculating the **Probability of Default (PD)** for **Low Default Portfolios (LDP)**
• Achieved results that were **48%** more **risk-aware** than observed default rates, supporting the use of the Pluto–Tasche method as a scalable, portfolio-agnostic approach for datasets spanning **20 million+ customers**

Research Internship, Max Planck Institute of Evolutionary Biology **Aug. 2022 - Oct. 2022**
Remote Internship
• Contributed towards **developing** a **mathematical population dynamics model** to study persistence and herbicide-resistance evolution in perennial invasive plants with complex life cycles, modelling stage-structured demography and selection dynamics

ACHIEVEMENTS AND EXTRACURRICULAR

INSPIRE Scholarship Awardee, Government Of India ; Royal Society Research Grant, Royal Society UK ; Secretary and Lead Vocalist for college band ; Harvard College Project for Asian and International Relations Asia Conference attendee

VOLUNTEERING

CDR.fyi - Growth team (Leading market intelligence platform in the CDR industry) **June 2026 - Present**
Contributing in developing research-driven content and resources for the durable carbon dioxide removal (CDR) ecosystem

Net Zero Tracker **Aug. 2025 - Sep. 2025**
Contributing towards maintaining an up-to-date, publicly accessible database to the leading independent net zero targets tracker

EDUCATION

Int. M.Sc. in Biological Sciences and B.E. (Hons.) in Electronics & Instr. Eng. **2019 - 2024**
Birla Institute of Technology and Science, Pilani (Grade: 7.54)

Indian School Certificate (ISC Board), Grade XII Grade X **2019**
City Montessori School (XII Grade: 98% {All India Rank: 9}; X Grade: 96.2%)

ONLINE CERTIFICATION

BCG Forage Job Simulation for Climate and Sustainability **Nov. 2025**

SOFTWARE TOOLS

MS Office, Advanced Excel, C, MATLAB, SAS, SQL, Python, PySpark, R language, Github, Canva, Final Cut Pro, Logic Pro
